

# Weekly Project Summary Report

Generated: 2026-02-19 09:38:01

---

## Summary:

These commits appear to be part of a project development timeline. The updates are mainly focused on improving the PDF summary layout, generating reports, and enhancing PDF export.

Some specific changes include:

- Adding timestamp to filename for better organization.
- Including report title and generation timestamp in PDFs.
- Implementing section headers and divider in PDFs.
- Adding page footer with page numbers and proper pagination.
- Adjusting fonts, spacing, and wrapping to fit pages better.
- Ensuring the reports directory exists before saving files.

Overall, these commits indicate a steady improvement of the project's PDF export and report functionality.

## Raw Commits:

---

- 2026-02-19 09:35:16: Improve PDF summary layout and add reports  
Add generated PDF reports under reports/ and enhance PDF export in summary.py. Changes: filename now includes timestamp (YYYYMMDD\_HHMMSS), introduce report title and generation timestamp, add section headers and divider, implement page footer with page numbers and proper pagination, tweak fonts, spacing and wrapping to better fit pages, and ensure reports directory exists. Also include two new PDF files (reports/20260219\_091428\_summary.pdf and reports/20260219\_summary.pdf) produced by the updated exporter.
- 2026-02-18 15:57:06: added new report
- 2026-02-18 15:55:42: Wrap PDF report text and add margins  
Import textwrap and add line-wrapping and consistent margins to the PDF report generator. Compute a margin and an approximate max\_line\_width for Helvetica 12, wrap summary and raw commit lines so long lines don't overflow, and update y-start positions and page-break checks to use the margin. Adjust header spacing and reapply fonts after new pages to maintain layout.
- 2026-02-18 15:51:06: Save summary and raw commits as PDF  
Add generated PDF reports and update PDF export to include raw commits. summary.py: import os, change save\_summary\_pdf signature to accept raw\_commits, ensure reports directory exists, write file into reports/, add bold "Summary:" and "Raw Commits:" headings, adjust fonts and pagination, and pass raw commits from \_\_main\_\_. Also add generated PDF files (20260218\_summary.pdf and reports/20260218\_summary.pdf).
- 2026-02-18 15:37:20: added emial.py to possibly send emails and added

- .pdf function in summary.py to export report into pdf format
- 2026-02-18 15:29:37: Update summary.py
  - 2026-02-18 14:53:58: update ai prompt to stop qwen ai model to respond in chinese
  - 2026-02-18 14:25:03: changed ai model to a more precise/larger one
  - 2026-02-18 14:06:57: enhanced prompt
  - 2026-02-18 13:11:31: Update summary.py
  - 2026-02-18 12:39:21: Update summary.py
  - 2026-02-18 12:30:05: update readme with ai and changed prompt to ollama model
  - 2026-02-18 12:26:50: Update summary.py
  - 2026-02-18 12:25:49: Update summary.py
  - 2026-02-18 12:22:23: Update summary.py
  - 2026-02-18 12:13:13: Update summary.py
  - 2026-02-18 12:06:21: 1
  - 2026-02-18 11:30:41: Initial commit
