

# Weekly Project Summary Report

Generated: 2026-02-19 09:14:28

---

## Summary:

The last few weeks have seen the following progress in a project:

- On February 18, 2026 at 15:57:06, a new report was added to the system.
- To wrap and format the PDF report's text, consistent margins were applied using the ``textwrap`` module. This ensured that long lines of text wouldn't overflow the page.
- A function named ``pdf`` in the ``summary.py`` file was updated to export the generated report into a PDF format.
- The ``summary.py`` file was changed or updated multiple times during this period, likely to include bug fixes and enhancements.
- An email functionality using ``email.py`` was possibly added, though no explicit mention of sending emails was made in the provided log.
- The AI prompt was changed to utilize the Ollama model, indicating an update to handle responses in a different AI language.

In summary, over the last week or so, new reports were added, formatting improvements were made, and potentially email functionality was added.

Additionally, there were updates to the AI prompt, utilizing a different model for handling language inputs.

## Raw Commits:

---

- 2026-02-18 15:57:06: added new report
- 2026-02-18 15:55:42: Wrap PDF report text and add margins  
Import `textwrap` and add line-wrapping and consistent margins to the PDF report generator. Compute a margin and an approximate `max_line_width` for Helvetica 12, wrap summary and raw commit lines so long lines don't overflow, and update y-start positions and page-break checks to use the margin. Adjust header spacing and reapply fonts after new pages to maintain layout.
- 2026-02-18 15:51:06: Save summary and raw commits as PDF  
Add generated PDF reports and update PDF export to include raw commits.  
`summary.py`: import `os`, change `save_summary_pdf` signature to accept `raw_commits`, ensure reports directory exists, write file into `reports/`, add bold "Summary:" and "Raw Commits:" headings, adjust fonts and pagination, and pass raw commits from `__main__`. Also add generated PDF files (`20260218_summary.pdf` and `reports/20260218_summary.pdf`).
- 2026-02-18 15:37:20: added `emial.py` to possibly send emails and added `.pdf` function in `summary.py` to export report into pdf format
- 2026-02-18 15:29:37: Update `summary.py`
- 2026-02-18 14:53:58: update ai prompt to stop qwen ai model to respond in chinese

- 2026-02-18 14:25:03: changed ai model to a more precise/larger one
- 2026-02-18 14:06:57: enhanced prompt
- 2026-02-18 13:11:31: Update summary.py
- 2026-02-18 12:39:21: Update summary.py
- 2026-02-18 12:30:05: update readme with ai and changed prompt to ollama model
- 2026-02-18 12:26:50: Update summary.py
- 2026-02-18 12:25:49: Update summary.py
- 2026-02-18 12:22:23: Update summary.py
- 2026-02-18 12:13:13: Update summary.py
- 2026-02-18 12:06:21: 1
- 2026-02-18 11:30:41: Initial commit
